

FK Series

Polypropylene Lug and Wafer Style Butterfly Valve

The FK Series butterfly valves offer superior strength and chemical resistance in highly corrosive environments and process flow conditions. This versatile industrial valve features double self-lubricating seals, direct actuator mount capability, and the option of either a lever handle or mounted gear box. A stainless steel "insert" lug version provides full bi-directional operation allowing disassembly of the downstream flange connection without the integrity of the upstream line.

FEATURES

- ISO dimensions for direct mounting of actuators.
- Trapezoidal elastomeric liner provides a bubble tight seal while keeping break-away torque at an absolute minimum.
- Liner completely isolates valve body from process flow and functions as a flange gasket on both sides of the valve.
- Body cavity features special channeling to prevent liner slippage and compression.
- PTFE seated O-ring shaft seals.

MATERIALS OF CONSTRUCTION

Seats and Seals:
EPDM or Viton®.

Disc:
PP (polypropylene).

Body:
GRPP (glass reinforced polypropylene).

Lug Style Valve ▶
Installs between flanges. Bolts are threaded into tapped holes from each side of mounting flange.

◀ Wafer Style Valve
Installs between flanges. Bolts span the body.
