

## SM Series

### Brass & Lead Free Brass Ball Valves with Compact Electric Actuators

The SM series motorized brass ball valves are ideal for HVAC and industrial on/off and modulating applications. The quarter turn ball valve features a unique direct mount system that allows for extremely quick and easy actuator mounting allowing for easy removal or replacement of the on/off or modulating compact electric actuator. Lead free brass valves are only available with on/off actuators.

When used with a modulating actuator, there are various flow optimizers (ball port inserts) that can be selected to achieve a precise flow control range.

#### FEATURES

- Simple, 1 clip-pin actuator mounting system offers outstanding stability and eliminates the cost, weight, and installation time required by other valve/actuator mounting systems that require brackets and multiple fasteners
- Pre-wired with a cable lead eliminates the need for opening the actuator and wiring in the field
- Manual override for emergency operation requires no special tools. Use a screwdriver to switch to manual operation and use a wrench to rotate the position indicator (on/off actuators only.) All valves can be manually operated with a large screwdriver if the actuator is removed
- Two internal limit switches (0° and 90°) to indicate fully open and fully closed position (on/off and 0-10vDC modulating only)
- 100% testing to ensure quality of all valve assemblies
- Visual position indicator (on/off actuators only)
- One size actuator fits all valve sizes which simplifies and reduces inventory
- Rugged gearbox construction for extended service life

#### MODULATING BALL VALVES

The addition of a parabolic disc to the full port ball valve converts the valve from a standard on/off ball valve to a more precise flow control valve. The disc, or "flow optimizing trim" makes the percentage of maximum flow increase evenly with direct relation to the percentage of the 90° rotation.

Full Port Ball Valve WITHOUT Flow Optimizer

Full Port Ball Valve WITH Flow Optimizer

#### SM SERIES MODEL NUMBERING

Model Number **XSMNXXXX**

NPT Size: \_\_\_\_\_

**C** = 1/2"  
**D** = 3/4"  
**E** = 1"  
**F** = 1 1/4"  
**G** = 1 1/2"  
**H** = 2"

Connection Type: \_\_\_\_\_

**N** = FNPT

Valve Body Material: \_\_\_\_\_

*omit* = Nickel Plated Brass  
**LF** = Lead Free Brass\*  
\*only available for On/Off

Electric Actuator Type: \_\_\_\_\_

**CE** = On/Off  
**CEKEP** = Modulating

Electric Actuator Voltage: \_\_\_\_\_

**On/Off type**

**B** = 24vDC  
**E** = 24vAC  
**F** = 12vDC

**Modulating**

**010** = 24vAC/DC w/ 0-10vDC  
**420** = 24vAC/DC w/ 4-20mA

Flow Optimizing Trim: \_\_\_\_\_

*for modulating only - various trims are available for each size. see chart on page 4 for options*

#### TEMPERATURE RANGE

**Valve:**  
-4°F to 266°F (-20°C to 130°C)

**Actuator:**  
-4°F to 158°F (-20°C to 70°C)

#### PRESSURE RATINGS

**Body:** 600 psi (41.36 bar) non-shock cold working pressure

**Close-off:** 360 PSI (24.82 bar) non-shock cold working pressure

**Max. ΔP:** 50 psi (3.45 bar) for typical applications

#### MATERIALS

**Body:** Ni Plated or Lead Free Brass

**Seats & Seals:** PTFE

## SMNCE & SMNLFCE Series

Nickel Plated Brass and Lead Free Brass 2-way ball valves with compact on/off electric actuator  
(Threaded end connection, 2-piece body, actuators are sized for 50 PSI pressure differential)

### DIMENSIONS, WEIGHTS & SPECIFICATIONS

Size	A	B	C	D	E	F	G	Actuator	Wt. (lbs.)	Model No.
1/2"	2.169	5.24	4.48	1.89	1.38	2.25	0.591	CE◇	2	CSMN*CE◇
3/4"	2.30	5.24	4.63	1.89	1.76	2.50	0.787	CE◇	2.2	DSMN*CE◇

\* = valve body material: omit = Nickel Plated Brass, **LF** = Lead Free Brass

◇ = voltage: **B** = 24vDC, **E** = 24vAC, **F** = 12vDC

### VALVE FEATURES

- Full port (except 1 1/2" and 2"), 90°, 2-way, on/off ball valve
- Nickel plated brass or lead free brass body
- Quick-mount stem for use with quick-mount actuators

### VALVE SPECIFICATIONS

**Temperature Range:** -4°F to 266°F (-20°C to 130°C)

#### Pressure Ratings:

**Body:** 600 psi (41.36 bar) non-shock cold working pressure

**Close-off:** 360 PSI (24.82 bar) non-shock cold working pressure

**Max. ΔP:** 50 psi (3.45 bar) for typical applications

### ELECTRIC ACTUATOR FEATURES

- 24vDC, 24vAC, or 12vDC operation voltage
- IP54 (protection from dust and splashing water) (IP65 available as special order)
- Limit Switch: two isolated end of travel
- Quick-mount for use with valves with Quick-mount stems
- Temperature range: -4°F to 158°F (-20°C to 70°C)
- Amp Draw:
  - 12vDC = 10 Watts
  - 24vDC = 20 Watts
  - 24vAC = 20 Watts
- UL and CSA approved, CE marked

\* = modulating actuator output: **420** = 4-20mA, **010** = 0-10VDC ◇ = Cv of Flow Optimizer (see Cv chart on page 4)

## VALVE FEATURES

- Full port (up to 1 1/4"), 90°, 2-way, flow control ball valve
- Various flow optimizing trim discs available for each size
- Nickel plated brass body
- Quick-mount stem for use with quick-mount actuators

## VALVE SPECIFICATIONS

**Temperature Range:** -4°F to 266°F (-20°C to 130°C)

**Pressure Ratings:**

**Body:** 600 psi (41.36 bar) non-shock cold working pressure

**Close-off:** 360 PSI (24.82 bar) non-shock cold working pressure

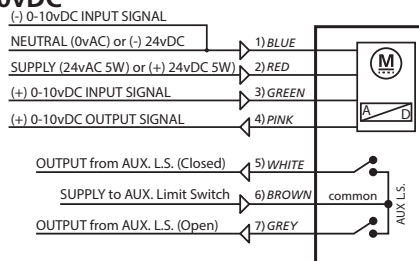

**Max. ΔP:** 50 psi (3.45 bar) for typical applications

## MODULATING ELECTRIC ACTUATOR FEATURES

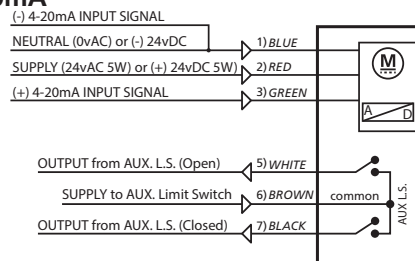

- 24 VAC/VDC with 4-20mA or 0-10VDC output
- IP54 (protection from dust and splashing water)
- Limit Switch: two isolated end of travel
- Quick-mount for use with valves with Quick-mount stems
- Temperature range: -4°F to 176°F (-20°C to 80°C)
- Amp Draw: 10 Watts
- UL and CSA approved, CE marked

### HOW TO CALCULATE A Cv

C<sub>v</sub> = Flow Coefficient    Q = Flow Rate    ΔP = Pressure Drop    G = Specific Gravity of Media

$$C_v = Q \sqrt{\frac{G}{\Delta P}}$$

$$Q = C_v \sqrt{\frac{\Delta P}{G}}$$

$$\Delta P = G \left( \frac{Q}{C_v} \right)^2$$
