

## SM Series

## Compact Motorized On/Off Ball Valves

The SM series motorized brass ball valves are ideal for HVAC and industrial on/off applications. The quarter turn ball valve features a unique direct mount system that allows for extremely quick and easy actuator mounting allowing for easy removal or replacement of the compact electric actuator.

### FEATURES

- Simple, 1 clip-pin actuator mounting system offers outstanding stability and eliminates the cost, weight, and installation time required by other valve/actuator mounting systems that require brackets and multiple fasteners
- Pre-wired with a cable lead eliminates the need for opening the actuator and wiring in the field
- Manual override for emergency operation requires no special tools. Use a screwdriver to switch to manual operation and use a wrench to rotate the position indicator. All valves can be manually operated with a large screwdriver if the actuator is removed
- Two internal limit switches (0° and 90°) to indicate fully open and fully closed position
- 100% testing to ensure quality of all valve assemblies
- Visual position indicator
- One size actuator fits all valve sizes which simplifies and reduces inventory
- Rugged gearbox construction for extended service life

### MATERIALS

**Body:** Ni Plated or Lead Free Brass

**Ball & Stem:** Stainless Steel

**Seats & Seals:** PTFE

[see page 2 for complete material details](#)

### SPECIFICATIONS

**Duty Cycle:** 50%

**Rotation:** 90°

**Limit Switch:** 2 SPDT dry contact switches

**Heater:** Available as special order - *consult factory*

**Electrical Connection:** 24" cable

**Speed (On/Off):**  
4 sec. Nominal to 10 sec. Max. for 90° rotation  
(varies with size and line pressure)

### END CONNECTIONS

**NPT Threaded (female):** 1/2" to 2"

### PRESSURE RATING

**Body:** 600 psi (41.36 bar)  
non-shock cold working pressure

**Close-off:** 360 PSI (24.82 bar)  
non-shock cold working pressure

**Max. ΔP:** 50 psi (3.45 bar)  
for typical applications

[see Pressure/Temperature Curve](#)

### TEMPERATURE RANGE

**Valve:**  
-4°F to 266°F (-20°C to 130°C)

**Actuator:**  
-4°F to 158°F (-20°C to 70°C)

[see Pressure/Temperature Curve](#)
